After talking with Tony Christofferson and Tom Shore of the Forest Service. The following information was gotten.

1. Joel Novack of the Forest Service is leaving and going to Moab. I suggested that they allow Sunroc to hire a contractor who could do the EA. Tom Shore was uncertain about the status of the EA and would need to check with Tom Lloyd of the Ferron office to see where they are in the process. I told him I believed an EA had been completed for the East property, but was not sure about the combination of the East and West properties making that EA obsolete. They currently are not on Forest Service at the East property.
2. I told Tony that we could review the East Property if all the information was in the plan, provided they were going to update the County Road between the two sites and not use the road on Private land.
- 3.) Tom Shore said he would get in touch with Tom Lloyd and get back to me on the status of the review and what needs to be done to complete it.
- 4.) Tony Christofferson stated they owed the Forest Service a mining plan for the West property.
